Maqasid al-Shari'ah (the objectives of Islamic law) is one of the most important concepts that play a crucial role in strengthening the contemporary Islamic finance today.

It is considered as a measurement to streamline the Islamic finance business activities, along with the different products offered in the market. The achievement of Maqasid al-Shari'ah in Islamic finance is an indication of the Shari'ah compliant status of the Islamic Financial Institutions activities.

However, in order to ensure a proper implementation of Maqasid al-Shari'ah in the current business environment, it is important at the initial stage to understand its concept, features, principles and categories, before moving onto the stage of implementation.
