Introduction to Islamic Jurisprudence

(al-Madkhal ila al-Fiqh al-`Am)

Shaykh Mustafa Ahmad al-Zarqa

This book is simplified introduction that teaches the university students the basic jurisprudential concepts and sound methodology of jurisprudential thought, and not jurisprudential details and rulings found in the classical books of fiqh. The jurisprudential rulings contained in this book are basically aimed at serving its teaching goal through examples, quotations, depiction of the abstract concepts and establishing the main issues in the mind of the student. I have added a number of clarifying examples that i have selected carefully so as to suit the beginner's need for clarifications.
